Drawings

1. Applicant is advised to review drawings. Applicant's drawing page 1 of 3 shows two separate figures which only one Figure is labeled. Figure 2 on the second page of the drawings shows a figure that is not relative to applicant's invention. Figure 4 which is mentioned in applicant's disclosure is not shown in the drawings.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-6, is drawn to a silicon capacitor, classified in class 361, subclass 306.3
 - II. Claims 7-14, is drawn to a method for forming a silicon capacitor, classified in class 29, subclass 25.41+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the silicon nitride (SiN) does not have to be done by sputtering i.e., it could be performed by CVD.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2831

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant has no telephone number of record with the USPTO therefore no attempt to contact the applicant by telephone was made to offer applicant a election by telephone.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
